- مهارت: **Skills**

- آگاهی: **Knowledge**

- Scaling up and transforming nursing policy
- Workforce planning and optimizing skill mix
- Positive work environment
- Evidence-based practice and innovation
- Enabling mechanisms (Regulation, Research, Partnership, and Leadership) in nursing policy

ضرورت و کاربرد دوره: Necessity and course application

Although the nursing profession has a growing role in the health policy arena, the rapidly changing health care environment means that clinicians need a sophisticated understanding of health policy. Nurses are assuming leadership roles in advocacy, research, analysis, and policy development, implementation, and evaluation, contributing to a growing need to educate nurses to specialize in health policy.

The course is a continued development of student competence in analytic methods for the study of complex nursing and health policy issues. The course considers how policy made by different branches of government deeply affects nursing as a profession, its ability to deliver care and the impact on the areas of technology development, assessment and management; professional practice regulation; and patient outcomes management.

نوع دوره : course kind
